

PLACEMENT METHODOLOGY OF THE PINEVILLE BEAUTY SCHOOL

The Pineville Beauty School is required by the U.S. Department of Education (ED) to disclose to prospective students certain information about the institution's Gainful Employment (GE) Programs. The institution utilizes the following placement rate methodology to calculate the job placement rates contained in the institution's Gainful Employment (GE) Disclosure.

Job Placement Methodology;

Graduates:

Graduate rates are calculated by subtracting the number of students who received a certificate from successfully completing a program at the Pineville Beauty School (Graduates) from the number of students who were scheduled to graduate in a program at the Pineville Beauty School (Scheduled Graduates) during the reporting period.

Scheduled Graduates – Graduates = Graduate Rate

Graduates Who Are Available For Employment:

Graduates who are available for employment are calculated by subtracting the number of students who received a certificate from successfully completing a program at the Pineville Beauty School (Graduates) from the number of students who were scheduled to graduate in a program at the Pineville Beauty School (Scheduled Graduates) during the reporting period.

Scheduled Graduates – Graduates = Graduates Who Are Available For Employment

Graduates Employed Within Their Field:

Graduates employed within their field are calculated by taking the number of students who graduated and successfully obtained a certificate from successfully completing a program at the Pineville Beauty School and who were employed in a field for which training prepared them within 180 days of obtaining their certificate (Graduates Employed Within Their Field) from the number of students who received a certificate from successfully completing a program at the Pineville Beauty School (Graduates) during the reporting period.

Graduates – Graduated Employed Within Their Field = Graduates Employed Within The Field They Were Trained.

Job Placement Calculation:

In order to calculate the job placement rate, you must take the number of Graduates Employed Within Their Field from Graduates Who Were Available For Employment.

Graduates Who Were Available For Employment / Graduates Employed Within Their Field = Job Placement Rate.
